### Presented by:

New England Sinai Hospital

### Jointly sponsored by:

Tufts University School of Medicine,  
New England Sinai Hospital and  
Tufts Medical Center Pulmonary,  
Critical Care and Sleep Division

The theme of Breathing Easier VII is the importance of oxygen for the pulmonary patient. Particular focus will be given the dynamic relationship between hemoglobin replacement and oxygen optimization. Beginning with an overview, symposium sessions will cover different aspects of this symbiotic relationship.

**Presentations will cover:**

- Mechanical ventilation
- Hemoglobin replacement strategies
- Airway stenting
- Oxygen use in different types of lung disease
- Latest oxygen delivery systems including mobile usage

Small group workshops preceding the symposium will cover issues relating to the main theme and include the role of oxygen and wound healing and oxygen delivery systems.

**Registration of \$150 includes tuition, workshops, symposium materials and luncheon. Call: 781-297-1337 to register or for information. Exhibiting opportunities available.**

**\$125 EARLY REGISTRATION BY SEPTEMBER 5, 2008**
