LEADING THE WAY *in* EXCEPTIONAL ELDER CARE MANAGEMENT

At every stage of our life we face new and different challenges. In our senior years, ensuring our health and emotional well-being becomes a vital concern.

That is why an important component of the Tradition Post Acute Network is Elder Care Management, composed of compassionate, experienced care managers who understand the needs of elder adults. Our Elder Care Management also benefits family members by easing their care responsibilities and helping them gain peace of mind.

Our specially selected Elder Care Managers are professional providers with experience, sensitivity and integrity. They are committed to providing support when it is needed – in times of crisis and as part of daily life. And most importantly, you can rely on them to provide the same high quality care and compassion you expect from family members.

Elder Care Management services include:

- Assessment of safety, medication, nutrition, care needs, mental health and emotional well-being
- Development of a care plan to meet the needs of the elder and his/her family
- Connection with community resources
- Help in evaluation and choice of appropriate housing plus assistance with a move
- Advocacy, including accompanying elders to medical appointments
- Evaluation and coordination of home care services

Tradition's preferred group of Elder Care Managers:

Caritas Home Care
