

LEADING THE WAY *in* EXCEPTIONAL SKILLED NURSING CARE

Many patients need continued care after they are discharged from the hospital. To ensure that your care needs are met by quality-focused providers close to your home, New England Sinai Hospital has developed an outstanding post acute care network. Sinai's Tradition Network is comprised of skilled nursing facilities, home care and elder care agencies, individually selected for our network because of their reputation for quality, safety and patient satisfaction. The nine (9) skilled nursing facilities in the Tradition Network are Joint Commission accredited or currently in the process of seeking accreditation. They provide short-term rehabilitation for medically stable patients who no longer require hospital-based care. Each facility offers exceptional skilled nursing care and their interdisciplinary care team helps you reach your maximum level of function with the goal of returning home or to a home-like setting in your community.
